SUMMARY

Senior Data & Analytics professional with 7+ years driving C-suite decisions across e-commerce, retail, and telecom — currently building LLM-powered tools and AI reporting pipelines that cut time-to-insight eliminating analyst bottlenecks.

AREA OF EXPERTISE

AI & LLMs: LLM Evaluation, Prompt Engineering, RAG, A/B Testing, Anthropic Claude API, LangChain, Vector DBs, MCP

BI & Analytics: Power BI, Tableau, Looker, dbt, QuickSight, GA4, Salesforce, HubSpot, Google/Meta Ads, Alteryx, Excel

ML: scikit-learn, PyTorch, MLflow, PySpark, Databricks, pandas, NLP, Time-Series Forecasting, CI/CD Pipelines

Cloud: Snowflake, BigQuery, SQL Server, MySQL, Oracle, Azure, AWS, Microsoft Fabric, ETL/ELT, RBAC, Data Lineage

KEY ACHIEVEMENTS

- Delivered **\$200K ARR** lift by converting one-time buyers into recurring subscribers through a propensity model and A/B tested onboarding flows — 21% conversion in 90 days against an 18% target.
- Outside defined scope, built a real-time Tableau + Salesforce recall tracking system with **automated customer updates** — reduced support tickets by 52% and cut resolution time from 12 to 4 days.
- Diagnosed **audience intent mismatch** in a Looker campaign dashboard — improved campaign effectiveness by 19% and drove 12.5% sales increase.

WORK EXPERIENCE

AI-Focused Data Analyst - Remote, USA

Nov 2025 – Present

- Engineered an ML model on Personio data flagging 90-day flight risks — SHAP values explain predictions, Claude API generates plain-English HR insights, surfaced in a live dashboard.
- Automated a daily briefing system that ingests live data, runs anomaly detection, retrieves historical context via RAG, and delivers a Claude-written spoken narrative to Slack + Streamlit — every morning at 7am.
- Deployed a CI/CD quality gate for LLM deployments, using tiered test cases to score accuracy, hallucination, latency, and cost. Implemented bootstrap testing via GitHub Actions to auto-fail regressive PRs, featuring a Streamlit model dashboard.

Senior Data Analyst — Nile Group, Chicago, USA

Nov 2024 – Oct 2025

- Led 3 analysts to unify 4 operational systems into a Snowflake + Microsoft Fabric analytics layer — standardized KPIs, implemented RBAC, row-level security, and data lineage for auditable reporting — 40% faster cross-platform integration.
- Self-initiated consolidation of siloed Marketing and Finance data into a Snowflake-backed Power BI dashboard with automated QA — eliminated quarterly discrepancies, cut turnaround 79%, from 7 days → 1.5 days.
- Deployed a postpaid customer propensity model at a major wireless provider — navigated stakeholder resistance via controlled pilot, 15% conversion lift vs rule-based campaigns, adopted as standard for future campaigns.

Data Analyst II — Regal Rexnord, Chicago, USA

Oct 2023 – Oct 2024

- Developed a Salesforce & Power BI pipeline tracking leads to closed deals — engineered a dynamic lead scoring model and identified 1-hour contact windows drove 34% higher conversion — drove 20% increase in qualified lead conversions.
- Delivered a Looker dashboard tracking campaign performance — diagnosed high-click, low-conversion as an audience intent mismatch, proposed funnel realignment — 19% campaign effectiveness lift, 12.5% sales increase.

Data Analyst — Nile Group, Chicago, USA

Jun 2023 – Oct 2023

- Led UA → GA4 migration, diving beyond the accepted 20% data discrepancy — corrected event mappings, refined GTM tags — reduced discrepancy to 9% and built a framework adopted as a repeatable standard for future migrations.

Data Analyst — Sogeti / Capgemini, Chicago, USA

Jul 2022 – Apr 2023

- Converted one-time buyers into recurring subscribers — built a propensity model to identify high-value targets, A/B tested onboarding flows, and achieved 21% conversion in 90 days against an 18% target — delivering \$200K ARR lift.
- Architected a migration pipeline from a legacy database using Alteryx with reusable workflows — drove 10% performance gain and reduced data prep time by 28%.

Data Analyst — Cybage Software, Pune, India

Jun 2018 – Dec 2020

- Built a Tableau + Salesforce dashboard to track returns, automating customer update emails at each stage — reduced support tickets by 52%, cut resolution time from 12 to 4 days, with the workflow adopted as the standard recall template.
- Integrated CRM and website data using Python and SQL to map leads to channels and deal status in Power BI — exposed conversion gaps, audited content that improved conversions by 12% and form completion rates by 25%.

CERTIFICATIONS

Anthropic Academy: Claude API, Claude Code, MCP Intro & Advanced, AI Fluency (2026)

DeepLearning.AI: GenAI with LLMs (2026) • **Google AI:** Generative AI, LLMs, Responsible AI (2025)

EDUCATION

M.S. Computer Science — Illinois Institute of Technology, Chicago, USA

May 2022

B.E. Computer Engineering — Pune University, India
